# Environmental KPIs

Fedcap Rehabilitation Services, Inc., the largest subsidiary of the Fedcap Group, operates large scale janitorial and maintenance contracts under its Total Facilities Management business, where we have a direct impact on the environment.

Fedcap Rehabilitation Services, Inc., provides recycling services that allow our customers to divert their waste from landfills and drive corresponding reductions in greenhouse gas (GHG) emissions. Fedcap tracks its recycling data across 6 major categories: Mixed Paper; Plastic; Metal/Glass; Wood; Masonry/Concrete; & Sheetrock.

This data is then converted to GHG reduction estimates utilizing the EPA's Waste Reduction Model (WARM).

The Waste Reduction Model (WARM) provides high-level estimates of potential greenhouse gas (GHG) emissions reductions, energy savings, and economic impacts from several different waste management practices.
